

Willowlee
SOD FARMS

Ideal Applications

- Residential Homes
- Commercial Properties
- Parks
- Sports Fields
- Golf Courses

Features

- **Darker** – A naturally darker turf that requires less fertilizer to stay looking healthy
- **Denser** – Improved density will help compete with weeds
- **Dwarfer** – Less vertical growth and canopy height equals less mowing.

Benefits

- Drought and Shade Tolerant
- Moderate Traffic Resistance
- Medium Texture and a naturally dark green colour
- Excellent Density & Uniform Turf Growth

Willowlee Sod Farms Product Data Sheet

If it's Not Ultra 3-D Sod, It's Just Grass

Ultra 3-D Sod is a blend of 100% TWCA approved varieties of Kentucky Bluegrass selected through careful research and development in order to provide improved drought tolerance and a uniform dark green color with moderate nitrogen needs. Our sod is produced using NSGA Green Certified methods.

Our sod is available in two sizes

Our Standard Rolls:

- 10 Square Foot— .929 Square Meters
- 2 foot x 5 foot roll size
- 800 Square Foot per Pallet

Our Big Rolls

- 322 Square Foot – 30 Square Meters
- 4 foot x 81 foot roll size

Our 3-D Ultra Sod is:

- Maintained at a cut height of 2¹/₄ "
- Grown in a Silt Loam native Soil
