

WILLOWLEE FERTILIZER PRODUCTS

Fertilizer is identified through the three numbers on the front of the bag, depending on your lawn and its stage of growth you need to choose the right fertilizer to keep your lawn green, healthy and happy.

How To Read a Fertilizer Label : e.g. 10-14-10

10 –The First number is nitrogen; this helps green up your turf and promote top growth

14 - The Second number is phosphorous; this promotes root growth and helps with plant establishment

10 – The Third number is potash; this helps fight drought and helps with high traffic
